| (3) Over 20,000 gallons/mo | \$0.082 Per Gallon |

(e) Fees Adjustments

The Annual Access Privilege/Operations & Maintenance Fee shall be increased annually, without further City Council action, at the anniversary of the effective date of Resolution No. 3239 by an amount equal to the percentage increase, if any, in the Consumer Price Index (CPI-U, Western Region - All items) over the previous 12-month period ending the calendar month prior to the anniversary date; *except that*, at the fourth anniversary date, and every fourth anniversary date thereafter, the rate shall only be adjusted (increased or decreased) upon action of City Council taken upon completion of a review of the appropriateness of the rate structure. In no event shall the rate be increased more than ten (10%) per cent over any twelve (12) month period between anniversary dates, unless otherwise approved by City Council. Should the annual change in the CPI-U indicate a decline, the fee shall not diminish.

2.9 - City Owned, Aviation Fuel Service, Retail Prices (RES. #3488)

The retail price of aviation fuel will be the higher of either the Minimum/Floor Retail Price or the Maximum/Ceiling Retail Price per formulas contained below:

(a) Minimum/Floor Retail Fuel Price

The minimum/floor retail fuel price shall be a cost per gallon figure determined by dividing the annual cost of providing self-serve fueling services by the number of gallons sold in the previous 12 months. A contingency reserve factor of two cents (\$0.02) is then added to the resulting number. This sum is then added to a) the sum of the wholesale cost of the fuel (including all related fees), and b) the sum of the federal and state fuel excise taxes. The result is the Minimum/Floor Retail Fuel Price.

This calculation shall be performed each time a fuel delivery is accepted by the airport personnel. The minimum/floor retail fuel price shall be the lowest retail aviation fuel price that can be charged at the self-serve fuel island until the next fuel delivery is accepted and a new Minimum/Floor Retail Fuel Price is calculated.

CITY OF CHANDLER
FEE SCHEDULE
Effective January 1, 2004

Example of determining a Minimum/Floor Retail Fuel Price.
The example uses theoretical figures incorporated into the above noted formula.

Annual cost of providing fueling services	\$ 25,000.00
Divided by - The total gallons of fuel sold in previous 12 months	÷ \$ 75,000.00
<i>Minimum markup charge required for cost recovery of fueling operations</i>	\$ 0.33
Add - Contingency reserve factor of \$0.02	+ \$ 0.02
	\$ 0.35
Add - Wholesale cost of fuel	+ \$ 1.00
Add - Federal & State Fuel Excise Taxes	+ \$ 0.35
<i>Minimum/Floor Retail Fuel Price</i>	\$ 1.70

(b) Maximum/Ceiling Retail Fuel Price

The maximum/ceiling retail fuel price shall be a cost per gallon figure that is reflective of the area aviation fuel market. It is determined by obtaining the current advertised aviation fuel prices for the Phoenix metropolitan area. An average fuel price is determined from the lowest three advertised fuel prices. An amount of 4% is deducted from the average that results in the Maximum/Ceiling Retail Fuel Price.

This calculation shall be performed each time a fuel delivery is accepted by the airport personnel or on a more frequent basis if it is determined by the Public Works Director or his/her designee that the area fuel market prices have shifted significantly. The maximum/ceiling retail fuel price calculated through the above formula, shall be the highest retail aviation fuel price that may be charged at the self-serve fuel island until the next fuel delivery is accepted or if a new Maximum/Ceiling Retail Fuel Price is calculated.

Example of determining a Maximum/Ceiling Retail Fuel Price
The example uses theoretical figures incorporated into the above noted formula

Average advertised price of lowest 3 area fuel vendors	\$ 2.00
Reduced by 4% of the average price	- \$ 0.08
<i>Maximum/Ceiling Retail Fuel Price</i>	\$ 1.92
